Release 0

Oskar Paolini, Sylvain Bellemare

December 04, 2015

1	Installation	3
2	Example: Registering a Piece	5

This is a community-based python wrapper around the [ascribe ownership REST API](#).

Installation

```
pip install ascribe
```

Example: Registering a Piece

```
>>> from ascribe import AscribeWrapper
>>> ascribe_wrapper = AscribeWrapper('your-token')
>>> piece = {
    'file_url': 'https://s3.eu-central-1.amazonaws.com/bucket/img.jpg',
    'artist_name': 'mystery',
    'title': 'universe',
}
>>> ascribe_wrapper.create_piece(piece)
{'piece': {
    'artist_name': 'mystery',
    'bitcoin_id': 'bitcoin-id',
    'date_created': '2015-01-01',
    'datetime_registered': '2015-11-28T20:42:19.917896Z',
    'license_type': {
        'code': 'default',
        'name': 'All rights reserved',
        'organization': 'ascribe',
        'url': 'https://www.ascribe.io/faq/#legals'
    },
    'title': 'universe',
